DETAILED ACTION

Response to Amendment

The applicant's amendment, received 5-25-2006, overcomes the examiner's prior art rejection. Hence claims 1-21 are allowed.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 12 was amended but it is not identified as "Currently Amended".

Hence this claim's disposition is changed to "Currently Amended" (which will not show up on the actual patent).

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. The IDS received 2-21-2006 has been signed and is included.
2. The applicant's amendments to the previously rejected independent claims overcomes the examiner's prior art rejection. The prior art, either alone or in combination, does not specifically teach:
 - a. measuring time slot interference;
 - b. determining if continuous/discontinuous communications;
 - c. TDD escape if interference variance is determined to be above a predetermined value (eg. for discontinuous communications); and
 - d. handover escape if interference variance is determined to be below a second predetermined threshold (eg. for continuous communications).

3. Claim 4 varies slightly from claim 1 in that it reduces cell loading if the variance is determined to be below a second predetermined threshold

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
